

The Antari Air Disinfection Machine, the AG-800, is lightweight and portable. It spreads a 'fog' to fill an entire space in any direction. The AG-800 can be used as a regular maintenance solution in cars, other vehicles, homes, offices, theatres, shops, malls, supermarkets, airports, gyms, hospitals, even smoko rooms.

## Easy Operation

Simply turn on the power and press the bottom on the handlebar. Operating with FLD sanitation solution, it lays a thin layer on the surface of objects in the room to inhibit bacteria growth. It completes reheating within 90 seconds and generates 3,000 cu.ft. of fog output per minute.

## Effective

The AG-800 has powerful sterilisation abilities and can kill a variety of bacteria, yeast, fungi and viruses. It can also inhibit oxidation. You are, of course, still recommended to wash your hands diligently and follow the WHO guidelines for preventing virus spread and contamination, but by periodically sanitizing spaces to kill germs, viruses etc. you are providing your colleagues and family with an additional layer of protection.

## Features

### FLD-05 Sanitation Solution

**500 ml per bottle**

**Function:** Kills fungi, germs, viruses e.g. flu virus, dust mites, bad odors  
**Ingredients/Manufacture date :** See package.

**Shelf life:** 5 years.

**Storage :** Keep in cool, dry place and avoid direct sunlight. Keep out of children's reach. Use within 6 months once opened, cap tightly after use.

## Specification

<b>Input Voltage</b>	AC 220-240V, 50/60Hz 3.5A
<b>Rated Power</b>	800W
<b>Warm-up Time</b>	2 minutes (approx.)
<b>Fluid Consumption</b>	10 ml / min
<b>Output</b>	3,000 cu.ft. / per min
<b>Fluid Tank Capacity</b>	0.8 L
<b>Compatible fluid</b>	Air Guard FLD-05
<b>Ambient temp. range</b>	0°C - 40°C
<b>Control</b>	Manual, Wireless
<b>Dimension</b>	L 315 W128 H218 mm
<b>Weight</b>	3.8 KG
