

PORTABLE PA SOUND SYSTEM HIRE

Hire the best portable sound system for any indoor or outdoor public address - speech, vocals and music. Excellent quality audio, good looking and reliable. These are probably the best portable sound systems available for hire in NZ. Portable sound you can take anywhere and operate with or without mains power, on sports fields, in halls and venues, in parks, a beach - any event, and they cover hundreds of people.

Easy to use - you don't need to be an audio pro. Powerful sound, top quality, and versatile and connect to any mp3 player.
Hire extra wireless mics and wireless extension speakers (slave speaker) are available to hire to extend the audio coverage area (see page 2)

Connect extra mics, connect ipod or mp3 player, operate over 6 hrs music, over 10 hrs speech on the battery or use mains

FOCUS 505 Hire for \$159 incl gst

Easily covers 50-150+ people audience
Perfect for wedding sound hire, funeral sound, speeches and corporate events and clubrooms, halls, meeting, trade show sound etc

Comes with 1 Wireless Mic (can use 2) and stand
CD player and USB mp3 player built in

Very light and portable PA and packs a punch. Halls, meeting rooms, outdoor court sized areas.

FOCUS 505

- Weighs about 6 kg, 313(H) x 220(W) x 215(D) (mm)
- 50W Amplifier and mixing facilities
- CD/MP3 Player built in
- Use up to 2 wireless microphones (1 included)
- Wired mic in, line in, line out plus Ext spkr connection
- Easily connect your ipod or mp3 player too (ask us for the cable)

CHALLENGER 1000 Hire for \$229 incl gst

Easily covers 100-300+ people indoor or outdoor audience
Perfect portable sound hire system for wedding, funeral, speeches and vocals, corporate events, sports, meetings, school halls and community venues.

Comes with 2 Wireless Mics, up to 4 can be used, and speaker stand
CD player and USB mp3 player built in
The trolley makes it easy to move around.

Choose this over the Focus if music is more of your event than speech. More bass, better sound and greater sound projection than the Focus. Use for PA and speaking in large halls, rugby or sports fields, multiple courts and public areas.

CHALLENGER 1000

- Weighs about 21kg, 500(H) x 350(W) x 300(D) (mm)
- 150W Amplifier and audio mixing facilities
- CD/MP3 Player built in
- Use up to 4 wireless microphones (2 included)
- "Voice priority" automatically mutes music when mics are used
- Retractable handle and trolley built in
- One fixed microphone input, line in, line out and voice priority switch
- Easily connect your ipod or mp3 player (ask us for the cable)

Expandable - Wireless extension speakers available (see next page)

STAGE PRO Hire for \$229 incl gst

Easily covers 100-400+ people audience
Perfect sound for weddings, vocals, singing and live instruments, sports and performances, stage and school hall use

Comes with 1 Wireless Mic, up to 4 can be used, and speaker stand
* Digital recorder built in (record to SD or USB)

* Bluetooth Receiver

Choose this over the Challenger if live music and a bit more volume wanted. More of a "professional musician" PA system but easy to use for the untrained and very applicable to any outdoor or indoor sound system needs. Great public address cover for rugby fields, multiple courts or a music stage for speaking, music and vocals.

* Options (these don't cost any extra - just ask that they be included if you need 'em)

STAGE PRO 1500

- Weighs about 13 kg, 424(H) x 290(W) x 250(D) (mm)
- 200W amplifier and full audio mixing facilities
- Use up to 4 wireless microphones (1 included)
- "Voice priority" automatically mutes music when mics used
- Line Out (RCA), Multiple Line In options, 3.5mm jack and RCA
- Instrument In, Microphone In 1 and 2 are combo jacks
- Bass/ Treble / Reverb for wired microphones.
- Active Out (XLR) and Aux Out for external active speakers.
- Easily connect your ipod or mp3 player (ask us for the cable)

Expandable - Wireless extension speakers available (see next page)

Lapel / Beltpack Handheld Wireless Headset Mics

Choose the wireless microphone options that suit your event - Handheld, Lapel or Headset available in any combination. No charge for changing.

EDWARDS

Wireless Extension Speakers \$99^{ea}- Hire extension (slave) speakers and link wirelessly from Stage Pro and Challenger PA's. No cables or wires and a massive 250 feet / 80 meter line of sight range between each speaker. Just tell us you want to hire a wireless slave speaker and for \$99 it is yours for the day.

Hire as many extension speakers as you need - they are all powered by the same high capacity built-in batteries as the master unit and no limit to the number you use and they cover hundreds of people - easily a rugby field sized area, or use them closer together for more even sound coverage in a smaller area.

This makes it easy to put speakers on the other side of a venue - no power or connection cables - and just as easy to site them on the other side of a road, river or railway line, or even in another building. You can easily cover a very wide area - kilometres if required. Each wireless slave speaker is also battery powered and has an 8 ohm speaker connection to add more local speakers in a cluster if required. Very quick, easy and economical.

Examples of how the wireless link (repeater) system works...

EXAMPLE 1 (One to many)

SLAVE SPEAKER Wireless Link

80 Metres / 250 feet

CHALLENGER Or STAGE PRO MAIN UNIT

SLAVE SPEAKER Wireless Link

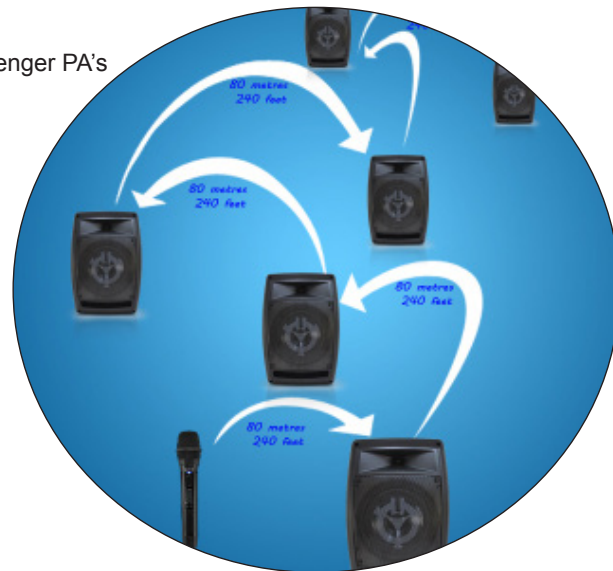

80 Metres / 250 feet

80 Metres / 250 feet

SLAVE SPEAKER Wireless Link

80 Metres / 250 feet

If within 80mtrs/250 feet of the main unit, each slave speaker receives directly from the main unit (see example 1).
If greater distances covered we link in series and "hop" from one to the next (see example 2).

EXAMPLE 2 (Series linked)

CHALLENGER or STAGE PRO

80 Metres / 250 feet

SLAVE SPEAKER

80 Metres / 250 feet

SLAVE SPEAKER

80 Metres / 250 feet

SLAVE SPEAKER

Hire as many extension speakers as you need - there is no real limit and each speaker can cover hundreds of people and easily be heard over a rugby field. For more or louder coverage additional speakers can be connected to each slave speaker. It is a very flexible and effective PA system... and did we say Quick and Easy to set up? Hire for school sports, street parade, PA or paging for trade show, stadium, large venue, outdoor large scale public address system, beach...
